

summer BEAUTY

Get summer skin perfection using mineral makeup from the Jane Iredale range.

Step 1 TOOLS OF THE TRADE

The key to perfect, seamless makeup application, lies in using the right tools. Makeup artists will tell you the most important factor is using brushes made from real fibres (horse hair) not synthetic.

Step 2 BASES

Using your foundation brush, apply a light veil of mineral foundation. These bases glide onto the skin and stay there all day – without the need for touch-ups – and they’re good for your skin, too!

Step 3 EYES

Summer means golden hues and light, shimmery effects over the eye. Make sure your brows are in order and coloured as these frame your face for the rest of your makeup application.

So Bronze Compact

Step 4 BRONZER

Don’t burn your skin, use a highlighting brozer to give you a light and dewy sun-kissed look. Using a kabuki brush, apply over cheekbones, and lightly over the nose and forehead.

Step 5 LIPS

All perfect lips start with a good line. Use your liner to create a base for the lipgloss or lipstick to stay inside. Go for a slightly deeper tone than the lip colour to define your pout.

WHERE TO BUY

The entire Jane Iredale makeup range is available from Dr Craig Layt’s clinic. Please phone 07 5597 4100 or visit www.drclayt.com for more information. Their office is located at Suite 1, AHC House, 14 Carrara St, Benowa.
